The college-going rate measures the proportion of students enrolling in postsecondary education in the fall semester after finishing high school, in most cases, immediately after high school. Since most students enrolling in postsecondary education do so immediately after completing high school, the college-going rate is an indicator of the total proportion that will or did enroll in postsecondary education. The percentage, therefore, reflects the accessibility of higher education as well as students' assessment of the value of attending college when compared to working, entering the military, traveling, or following other pursuits.

New Methodology: This report reflects a new methodology. The new methodology began with the 2010 Fall College-Going Rate report so this is the fourth year the methodology has been used. This new methodology focuses on students that (1) graduated from an Arkansas public school district in Academic Year 2011-2012, (2) are first-time entering students in the 2012 Fall term, and (3) are Arkansas residents. This new methodology more closely follows that used by the National Center for Education Statistics (NECS). However, there are three differences:

- (a) NECS filters by the age range of 16-24 ADHE ignores age but focuses on high school graduates from the previous year as most all high school graduates are between the ages of 16 and 24;
- (b) NCES includes GED students as their report is based on a survey. ADHE does not have data on annual graduating classes of GED students, therefore, GED students are excluded; and
- (c) Since the NCES report is a survey, it may include private high schools and home school students. ADHE has no data on annual graduating classes of private high schools or home school students. ADHE obtains data on graduating classes of Arkansas public high schools (from the Arkansas

Department of Education). Therefore, the new methodology is a College-Going Rate calculation for Arkansas public high school graduates only.

<u>Old Methodology</u>: The old methodology consisted of a Fall student cohort of (1) first-time, (2) full-time, and (3) on-campus students that attend an Arkansas public or independent institution after completing high school or GED.

The college-going rate for all Arkansas **public** <u>and</u> independent institutions for the 2013 Fall term was **54.9 percent**. This represents an increase of 2.0 percentage points from the previous fall term. Note that over the 5-year period reviewed, the CGR has been increasing each year.

NOTE: Data for the Private/Independent institutions were not available until the 2010 Fall semester.

The share of CGR students at 4-Year Universities has decreased from 33.0 percent to 32.8 percent (a decrease of 0.2 percentage points). The share of CGR students at 2-Year Colleges has increased from 18.2 percent to 18.9 percent (an increase of 0.7 percentage points). The share of CGR students at Private/Independent Institutions has increased from 1.7 percent to 3.3 percent (an increase of 1.6 percentage points).

The majority of CGR students attend 4-Year Universities.

Gender: As shown below, females go to college at higher rates than males.

Race/Ethnicity: As shown below, Whites, Hispanics, and Asians have the highest college-going rates.

NOTE: This report does not take into account students that go to college out-of-state, out-of-country, or to institutions that do not participate in the AHEIS/SISDB reporting system.

UAMS shows 0 students above as they do not accept first-time entering freshmen due to the lack of a general education curriculum.

It should be noted that the private/independent institutions do not provide all data necessary for fully accurate calculations for the College-Going Rate; therefore, their information can be considered as incomplete.

ADHE Executive Staff recommend that the AHECB accept this report.

because of varying survey procedures and coverage. High school completers include GED recipients. Detail may not sum to totals because of rounding. SOURCE: American College Testing Program, unpublished tabulations, derived from statistics collected by the Census Bureau, 1960 through 1969, U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1970 through 2012. (This table was prepared May 2013.)

^{\1\}Individuals ages 16 to 24 who graduated from high school or completed a GED during the preceding 12 months.

^{\2\}Enrollment in college as of October of each year for individuals ages 16 to 24 who completed high school during the preceding 12 months.

^{\3\}Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the methodology used in prior years. NOTE: Data are based on sample surveys of the civilian population. High school completion data in this table differ from figures appearing in other tables
