# ARKNASAS DEPARTMENT OF HIGHER EDUCATION 2009 REPORT ON STEM ENROLLMENT AND GRADUATION TRENDS 

The purpose of this report on Arkansas STEM (Science, Technology, Engineering, and Mathematics) program activity is to inform education and policy makers about the need to prepare and graduate more students with degrees in STEM education fields.

Arkansas is witnessing a significant shortfall in its ability to meet the STEM education needs of its students which will have tremendous implications for the state's scientific and engineering workforce needed for the next decade. Addressing this issue is absolutely essential for the continued economic success of Arkansas. All Arkansas citizens must have the basic scientific, technological, and mathematical knowledge to make informed personal choices, to develop human capital, and to thrive in the increasingly technological global marketplace. However, the number of STEM graduates in Arkansas has declined during the past five years.

## Enrollment Trends

As a percent of total STEM majors over six years (fall term only, AY2004-09), freshmen account for $35.5 \%$ of STEM majors, sophomores account for $23 \%$ of STEM majors, juniors account for $16.9 \%$ of STEM majors, and seniors ${ }^{1}$ account for $24 \%$ of STEM majors. ${ }^{2}$ These percentages have been relatively stable during the time period reviewed.

As seen above, STEM enrollment has steadily increased from AY2003 to 2008 for each student classification. Overall, STEM enrollment rose from 9,745 in AY2004 to 10,288 in AY2009 marking a $5.6 \%$ increase. $^{3}$ However, this does not hold true for students graduating within the STEM fields as discussed below under the Degree Production section.

Most STEM majors are white males ( $75.3 \%$ white, $68 \%$ male). The largest decline ( $-14.6 \%$ ) in STEM enrollment came from the Non-Resident Alien category. The Hispanic category experienced the largest increase (81.1\%) between AY 2004-09 (see Table 2).

Biology/Biology Sciences General (CIP 26.0101) has seen a $54.2 \%$ increase in enrollment between AY 2003 and AY 2008 and currently maintains the highest enrollment of the STEM majors offered in Arkansas (at $24.3 \%$ or 2,920 students in AY2008). Rounding out the top five behind Biology are Computer and Information Sciences, General (CIP 11.0101 at 16\%); Chemistry, General (CIP 40.0501 at 8.2\%); Mechanical Engineering (CIP 14.1901 at 5.2\%); and Mathematics, General (CIP 27.0101 at $4.2 \%){ }^{4}$

## Degree Production

The total number of STEM students receiving bachelors degrees from four-year institutions has declined from 1,277 to 1,221 (a $4.6 \%$ decrease) between 2004 and 2008. ${ }^{5}$ At the associate degree level (including both two-year and four-year institutions), the number of STEM students has increased nearly $27 \%$ between 2004 and 2008 (from 562 to 712 with the highest increase during the 2008 academic year). However, this growth only occurred at the two-year institutions (see Table 3).

At the four-year institution baccalaureate level, $\mathrm{UAF}^{6}$ continues to have the highest number of STEM graduates, but has experienced a $12.9 \%$ decline between AY2004 and 2008. In addition to UAF, four other schools (ASUJ, ATU, HSU, and SAUM) have also experienced a decline in STEM graduates. The total number of state-wide graduates has increased by $9 \%$, but total state-wide STEM graduates have declined by 1.8 percentage points. (See Table 4).

Of the 10,717 total STEM graduates (associates, bachelors, masters and doctoral/professional, AY2004-08), the majority (25.3\%) are from the CIP category 11: Computer and Information Sciences and Support Services, however, this category has seen the highest decline ( $-44.8 \%$ ) in bachelor degrees awarded. ${ }^{9}$

Of the AY 2004 Baccalaureate STEM graduates, 325 enrolled in graduate school; of the AY 2008 Baccalaureate STEM graduates, 191 enrolled in graduate school. Over the course of five years, those baccalaureate degree holders who majored in a STEM related field seeking a post-baccalaureate STEM degree have declined by $41.2 \%$ as seen on Table 8.

## Discussion

As referenced previously, the good news is that overall STEM enrollment is up by 5.6\% since AY 2004. As a percent of all statewide graduates, those obtaining doctoral degrees in STEM fields have risen by $3.9 \%$ over the past 5 years. ${ }^{10}$ There is also a steady increase in enrollment for those majoring in Construction Engineering Technology/Technician (CIP 15.1001), ${ }^{11}$ and an increase in graduation rates for those majoring in Chemistry General (CIP 40.0501) and Biology/Biological Sciences General (CIP 26.0101). ${ }^{12}$ While these are all good indicators, there are also some overall problems that need attention.

Computer and Information Sciences General (CIP 11.0101) is listed in the top five STEM majors (as a percent of total STEM student majors), but its enrollment has declined by 27\% between 2003 and 2008. In addition, other declining STEM majors include Data Processing and Data Processing Technology/Technician (CIP 11.0301 declined by -51.9\%); Industrial Engineering (CIP 14.3501 declined by -53\%); Agricultural/Biological Engineering and Bioengineering (CIP 14.0301 by -32.6\%);

[^3]Electrical, Electronics and Communications Engineering (CIP 14.1001 by -17.8\%); and Computer and Information Sciences, General (CIP 11.0101 by -17.3\%). ${ }^{13}$

Education majors focusing on STEM related fields are also in decline. Overall enrollment dropped by $16.7 \%$ between AY 2005 and AY 2009. ${ }^{14}$

The following five STEM majors went from a few majors enrolled to zero in the course of only four years: ${ }^{15}$

| Table 9: STEM Enrollment On The Decline |  |  |  |

National trends are only slightly better, but not on target with expectations (see Table 10). A coalition formed in 2005 known as Tapping America’s Potential (TAP) came out with an ambitious goal of doubling STEM bachelor's-level graduates by 2015. In their 2008 progress report, they found that the 200,000 number of graduates had only slightly increased. ${ }^{16}$

Table 10
U.S. STEM Bachelor's Degree Production Not on Track To Meet TAP Goal

Source: National Science Foundation.

[^4]According to a 2005 GAO report, the national number of STEM enrollments increased by $21 \%$ from AY1995 to AY2004, and total number of STEM graduates increased by 8\% during that same time period. ${ }^{17}$

## Summary \& Recommendations

In Arkansas, STEM enrollments have increased over the past five years. However, STEM graduation rates have either remained steady or decreased over the course of a five year period. This should represent a significant concern for higher education officials and faculty - that efforts are working to improve the number of students seeking STEM credentials from an input perspective (more majors). But looking at the issue from an output perspective (graduates), the outlook is worsening.

In order to reverse the current trend of fewer graduates, STEM institutions should consider establishing support mechanisms, such as:

1. Residential STEM communities or STEM dorms;
2. Special access to tutors;
3. Customized or special new student orientations for STEM students; and/or
4. STEM student organizations and/or social organizations;
5. Develop targeted scholarships for juniors and/or seniors in STEM fileds;
6. Develop business/education internships for STEM students.

## STEM Designated Degree Programs

Effective date: April 8, 2008; Updated September 25, 2008

The following is a list of Classification of Instructional Programs codes published by the National Center for Education Statistics (NCES CIP codes) that have been designated by ICE as science, technology, engineering, or math (STEM) degrees for the purpo
In order for F-1 students to qualify for this 17-month extension, the code for the student's degree program must be on this list. Other requirements are found in the regulatory language.

## STEM Designated Degree Programs

Effective date: April 8, 2008; Updated September 25, 2008
 published by the National Center for Education Statistics (NCES CIP codes) that have been designated by ICE as science, technology, engineering, or math (STEM) degrees for the purpose of approving a 17-month STEM the student's degree program must be on this list. Other requirements are found in the regulatory language.
