# **The Financial Condition of Arkansas Institutions of Higher Education**

## **Introduction**

The purpose of this report is to describe the financial condition as well as the challenges experienced by Arkansas's Public Institutions of Higher Education. These challenges have been brought on by a number of competing, and often conflicting demands: fluctuations in enrollments; lagging or declining state support; increasing public and political pressure to hold tuition down; underprepared students; and students who come to college with the expectations of new amenities and programs from the institutions.

This financial conditions report will address several topics including productivity-based funding, revenues versus costs in higher education, funds per full-time equivalent (FTE) student, the increased volume of construction on campuses, a comparison of Arkansas faculty salaries to other Southern Regional Education Board (SREB) states and various charts and graphs on tuition and fees by institution, expenditures by function, fund balances, operating margins, athletic incomes and expenditures, scholarship expenditures and measures of performance. It will also include some recommendations for future financial policies of the Arkansas Higher Education Coordinating Board.

## **Performance-Based to Productivity-Based Funding**

From the early 1990s to the present, Arkansas has experienced a more positive pattern of growth than the nation as a whole. Unfortunately, because of lower rates of educational growth and development throughout most of the 20<sup>th</sup> century, Arkansas still lags significantly behind the region and the nation. Former Governor Mike Beebe recognized the importance of Arkansas's educational attainment for the future economic growth and the prosperity of its people. On January 11, 2011, Governor Beebe issued a challenge to the State and to its institutions of higher education by stating: "We can and must double the number of college graduates in Arkansas by 2025 if we are to stay competitive. This is a lofty goal aimed at the future, but we must begin implementing it today." More recently, Governor Asa Hutchinson has established a goal of 60% of Arkansans with a post-secondary credential by 2025.

In response to former Governor Beebe's challenge of doubling the number of college graduates, the Arkansas General Assembly, ADHE and the state's public institutions of higher education accepted the challenge by supporting Act 1203 of 2011 (AN ACT TO PROMOTE ACCOUNTABILITY AND EFFICIENCY AT STATE-SUPPORTED INSTITUTIONS OF HIGHER EDUCATION; TO CLARIFY FUNDING FORMULA CALCULATIONS FOR STATE-SUPPORTED INSTITUTIONS OF HIGHER EDUCATION). Act 1203 of 2011 was enacted by the Arkansas General Assembly and on April 5, 2011, former Governor Beebe signed it into law. Over a period of five years starting with FY 2014, 25 percent of an institution's base funding will be allocated according to performance or outcomes.

Significant time and effort from ADHE and all of the public institutions was put into developing models for implementing the performance-based funding component of Act 1203. Some of the guiding principles in developing the models included increasing credentials without compromising academic rigor; missions, role and scope; economic development; need for flexibility; keeping it simple; and data-driven decision making.

As described above, Arkansas has historically funded higher education loosely based on enrollment-based formulas, with a performance component introduced in 2011 which penalized institutions that did not meet predetermined performance measures. Most research around state funding formulas suggest that both approaches can be problematic. Additionally, funding had fallen short of the amounts recommended by the formulas due to limitations on the state's budget. As a result, only a small number of institutions had received the full amount recommended by the formula.

A fully outcomes-based model was proposed in the Closing the Gap 2020: A Master Plan for Arkansas Higher Education to address these concerns. Substantial efforts to adopt such a model began through an established Institutional Funding work group. The group held an initial meeting in October 2015 and continued to work since that time to develop the model. The Arkansas Higher Education Coordinating Board (AHECB) adopted a framework for the

outcomes-based model at its meeting on July 29, 2016 and the new funding policy was enacted with the passage of Act 148 of 2017.

Act 148 of 2017 repealed the needs-based and outcome-centered funding formulas that were created by Act 1203 of 2011. This act directs the AHECB to adopt policies developed by the Department of Higher Education necessary to implement a productivity-based funding model for state supported institutions.

Productivity-based funding is a mechanism to align institutional funding with statewide priorities for higher education by incentivizing progress toward statewide goals. At the same time, such models encourage accountability to students and policymakers by focusing on the success of students through the achievement of their educational goals. The new funding model is built around a set of shared principles developed by institutions and aligned with goals and objectives for post-secondary attainment in our state.

The productivity measures consist of four categories: (1) Effectiveness; (2) Affordability; (3) Adjustments; and (4) Efficiency. Each of these categories contain certain metrics. Effectiveness (Credentials, Progression, Transfer Success, Gateway Course Success) makes up eighty percent (80%) of the formula. Affordability (Time to Degree, Credits at Completion) makes up twenty percent (20%). Adjustments are applied for Research (4-year only) and Diseconomies of Scale (2-year only). And, Efficiency (Core Expense Ratio, Faculty to Administrator Salary Ratio) applies a plus/minus two percent (2%) change to the formula. Other future technical modifications, such as an addition of an inflationary index and refining of existing metrics will be considered when necessary.

In the formula, institutions receive points based on the requirements of each metric. Points are totaled and applied according to the weight of the metric. Once the points for the Effectiveness and Affordability measures are totaled, the Adjustments will be applied to the points accordingly. Finally, the Efficiency measure will be applied against the adjusted total. This final total of points will become the institution's Productivity Index. That Productivity Index will be compared to the prior year's index for that institution. For example, in 2018 the Productivity

Index uses data averages from the Baseline subset of AY2014, AY2015, and AY2016 and compares it to the 3-year average from the Comparative subset of AY2015, AY2016, and AY2017. The difference in the Baseline Index and the Comparative Index is the Change in Productivity Index. This percent change determines the distribution of funding.

The AHECB will limit the funding recommendation generated by the productivity-based funding model to no more than a 2% growth over the prior year's Revenue Stabilization Act (RSA) general revenue funding amount for four- and two-year institutions. The total RSA general revenue recommendation for each four- and two-year institution will include any new state funding recommendation and reallocated funding recommendation. If an institution's funding recommendation is greater than a 1% increase in 2018-2019; 1.5% increase in 2019-20; 2% increase thereafter over its existing RSA general revenue funding, the Board will recommend that the amount of funding recommendation up to 2% based on the graduated scale would be added to an institutions existing RSA general revenue and any funding recommendation in excess would be one-time incentive funding for that institution. The AHECB will recommend redistribution of one-time incentive funding in the following year based on productivity index changes.

Within each four- and two-year institution group, RSA general revenue funding will be recommended for reallocation from institutions with productivity index declines to institutions with productivity index increases. Reallocation of RSA general revenue funding to institutions with productivity increases will be calculated as a percentage of the contribution to the overall four- or two-year institution productivity index increases. Reallocation for institutions with productivity index declines will be based on their percentage of productivity index decline. Recommended reallocation will be introduced on a graduated scale starting with 1% of an institution's RSA general revenue funding being reallocated in 2019-2020; up to 1.5% in 2020-2021; and up to 2% in 2021-2022 and thereafter.

## **Revenue versus Cost in Higher Education**

Every organization – whether it is for-profit, nonprofit or government – faces the same financial imperative: It must cover its financial outflows (costs or expenditures) with financial inflows

(revenues). Although deficits can occur, they cannot be maintained forever. The one exception to this rule may be the federal government, which has the power to tax and print currency – even these actions have political limits. “Every other type of organization must choose a cash-flow strategy that ensures that revenues will at least cover its expenditures and debt service.” – *Robert E. Martin, “Revenue-to-Cost Spiral in Higher Education”*

Colleges and universities represent a specific type of nongovernment cash-flow strategy. Higher education is composed of state-supported colleges and universities, private nonprofit schools, and a number of for-profit schools. State-supported schools are the largest component. While they are part of state governments, they are very similar to private higher education in terms of their cash-flow management challenges, governance structures, role of third-party payers and the services they provide.

The foregoing was presented to establish that colleges and universities, whether state-supported or private non-profit institutions, must make certain that their revenues cover their expenditures and debt service, which presents unique challenges for state-supported colleges and universities. Unlike businesses which see their sales and profits decline during an economic downturn, state-supported colleges and universities may experience enrollment increases due to layoffs and unemployment, thereby increasing cost to educate additional students; along with state revenue decline causing a reduction, thereby creating the need to increase tuition and fees to cover the lost state support.

This demand for services experienced by colleges and universities during an economic downturn is the inverse of the lack of demand for services from for-profit businesses. While businesses are laying off employees, colleges and universities are forced to hire new faculty and support staff (admissions staff, financial aid staff, etc.) to meet the demands of new enrollment. As businesses are cutting expenses, state-supported colleges and universities must increase expenditures if they are to provide services to the larger student body. For example, if state support makes up 50 percent of the funding for higher education and tuition and fees make up the other 50 percent, and no new state dollars are received for higher education, then any cost of living increases or inflation must be balanced by reducing costs/services or by increasing tuition

and fees. If inflation increases by 3 percent, costs/services must be cut by 3 percent or tuition and fees must increase 6 percent.

Often, the response is to encourage institutions to seek private funds to replace lost state support. However, many times private donors are unwilling to give to support the ordinary operating expenses associated with educating the students (unrestricted educational and general funds) because they consider those things the responsibility of the state and there is no notoriety or recognition associated with donations for operating expenses. Donors are willing to give to a building fund (to be able to name the building or a room) and to sponsor a specific type of research program that has the potential of benefitting their business, or them personally, but such funds are considered restricted funds since their use is designated by the donor. These funds provide no relief for the overburdened unrestricted educational and general needs of the institution.

Successive economic downturns such as that experienced after Sept. 11, 2001, and during the Great Recession have been devastating for Arkansas higher education, in that institutions are spending less per student from all sources of revenue. During that same time period the enrollment growth in Arkansas has been one of the highest in the SREB and in the nation. The Delta Cost Study summed it up this way – students are paying more and getting less. Higher education is losing the battle with the combination of more students, less state funding and tuition rates that exceed inflation. Several recent studies show that the institutions are actually spending less per student than they did 10 or 20 years ago in constant dollars, which makes the idea of cutting expenditures less than plausible.

The cost cutting that has occurred has been in the form of using adjunct faculty to replace full-time faculty and the postponement of maintenance of facilities. The shift towards adjunct faculty may cause unintended consequences. Research has shown that an increase in adjunct faculty has negatively impacted graduation and retention rates. More specifically, the impact can be seen on first- to second-year retention because adjuncts are more likely to teach introductory courses. Many of these negative outcomes are caused by lack of professional development for adjunct faculty, adjunct faculty are not paid for office hours which results in students receiving less out

of the classroom support, and typically institutional policies are created around full-time faculty. Another undesirable action is to forego the maintenance of facilities allowing for huge deferred maintenance accumulations that represent a high percentage of the replacement value of the facilities. These things are not only true for Arkansas; they are true nationally as well. Impacts of declining state funds on Arkansas Higher Education include:

- Tuition and fee increases
- Reduced access
- No progress on equity funding issues
- Outdated instructional equipment
- Reduced ability to attract external funding
- Inability to recruit and retain faculty/staff
- Further deterioration of facilities
- Worst case scenarios: enrollment caps, loss of accreditation, no new programs, lost jobs
- Program eliminations and reduction in public service.

As the economic recovery has strengthened, enrollments have declined (particularly at community colleges), as jobs have been created and individuals have gone back to work. Though state revenues have recovered, colleges and universities have not seen reinvestment in their funding due to competing demands from K-12, health care and other priorities.

### **Funds per FTE Student from All Sources**

Table 88 of the *SREB Factbook on Higher Education* published in June 2019 shows that the total funds available per FTE student in Arkansas's universities increased by 7.36 percent in the five year period from 2012-13 to 2017-18. Delaware experienced the lowest increase for this period at around 7.3 percent. Florida experienced the greatest gain in funding available per FTE student, a 36.6 percent increase. For 2017-18, Arkansas's universities ranked ninth (9<sup>th</sup>) in state funding and twelfth (12<sup>th</sup>) in tuition and fee revenues per FTE student in the SREB region.

### Five-Year Change In Total University Revenue Available per Student from All Sources - 2012-13 to 2017-18

Table 89 of the ***SREB Factbook on Higher Education*** contains the comparable data for Two-Year Colleges. Arkansas’s two-year schools funds per FTE student increased approximately 37 percent over the same five year period. West Virginia experienced the smallest increase for this period at 7 percent, while South Carolina had the greatest gain in funding available per FTE student with a 37.01 percent increase. For 2017-18, Arkansas’s two-year colleges ranked second (2<sup>nd</sup>) in state funding and ninth (9<sup>th</sup>) in tuition and fee revenues per FTE student in the SREB region.

From 2012 to 2017 the enrollment growth (Table 21 of the *SREB Factbook on Higher Education*) in Arkansas Public Higher Education was the thirteenth highest percentage growth rate at -6.7 percent. The average growth rate in the SREB states was -0.62 percent and the national average growth rate was -2.27 percent. Only 4 states produced positive growth over the five-year time period.

### **The Reason for the Volume of Construction on University and College Campuses in Arkansas**

Arkansas universities are making a concerted effort to be good stewards of the facilities that the state and private donors have funded. These facilities require continued maintenance and renovations throughout their existence. Today, over 50 percent of the university facilities are more than 30 years old. After a facility has reached the 30-year mark, most of the life expectancy of the building systems has elapsed. The average Facilities Condition Index (FCI)

for 2020 for Arkansas's educational and general facilities is 50 percent, meaning 50 percent of the life expectancy of the average facility has passed. The national literature states that when the FCI for a campus exceeds 15 percent it should raise a red flag that signals that the facility's maintenance needs improvement and a dedicated source of funding.

In response to the huge accumulated deferred maintenance, universities are renovating many older facilities whose FCI is higher than 50 percent. The choice between renovating a facility and replacing it is based upon the relative cost of the two options.

**Why is all this renovation and new construction necessary?** Today's students are coming to the universities to learn that their high schools had better and more modern labs and equipment than the universities. Many universities' laboratory facilities have been seriously outdated for many years and were not or could not be brought into compliance with Environmental Protection Agency (EPA) regulations. Students come to a university expecting to receive instruction on the latest technology available, but are finding labs with outdated equipment and technology.

If universities are to produce graduates in the sciences and engineering programs who can compete in future economies, facilities must be renovated, updated or replaced, which is why much of the construction activity is taking place on college and university campuses.

Not surprisingly, systems including electrical, in the older facilities are not adequate to handle all the new computing equipment, which was not even contemplated when the buildings were designed. Computer equipment also places stress on outdated air conditioning systems. In addition, EPA regulations necessitate new plumbing for labs in the sciences and engineering programs. Unless these renovations are completed, graduates will find their degrees have not prepared them for the careers they have chosen.

Lack of dedicated capital improvement funding means that institutions have increasingly turned to bond indebtedness to finance essential improvements, leading to rising tuition or fees. SREB recently surveyed its member states to learn more about state supported funding for capital needs. Only two states, Alabama and Oklahoma, indicated that higher education received no state support for capital needs. The remaining fourteen SREB states do receive state funding to

address capital needs either as recurring/designated funding, surplus/non-recurring funding or some combination of the two. In 2006, Arkansas did designate funding for higher education capital needs through General Obligation (GO) Bonds, but institutions have had to rely on surplus/non-recurring funds in more recent years. Lack of dedicated capital improvement funding is a common challenge across SREB states and you can find more detail for each SREB state in Appendix A. Eight of the sixteen SREB states are currently considering GO Bonds to address this challenge. Arkansas is not currently considering GO Bonds.

### Arkansas Faculty Salaries

The *SREB State Data Exchange* information published in February 2020 compares average faculty salaries in each of the SREB states with the regional average. The average university faculty member’s salary in Arkansas has increased \$1,414 from 2018. However, it remains the lowest in the region at \$13,230 below the SREB average.

Two-year college salaries decreased by \$255, dropping to 15<sup>th</sup> in 2019. The average faculty salary in Arkansas for two-year colleges of \$45,103 was \$10,067 below the SREB average.

While Arkansas has made great strides in improving faculty salaries, it is hard to be competitive in higher education with salaries still below the regional and national average.

Closing the Gap 2020: A Master Plan for Arkansas Higher Education addresses the need to increase faculty salaries to the regional average. Considering the goals set forth in the master plan, raising salaries to attract and retain quality faculty are essential to improving student retention and completion. In order to remain competitive and affordable, resource allocation decisions are very important. It will be imperative going forward to examine resource allocation by analyzing expenditures per full-time equivalent (FTE) student in the following functional expense categories - Instruction (includes faculty salaries), Academic Support, Student Services and Institutional Support. Institutions must make decisions that will maximize their core functional expenses in a way that will improve student success. One potential study that is being

considered to help in further analyzing resource allocation is the annual SACUBO Benchmarking Study. Appendix C will provide further details for each institution's expenditures per FTE by functional expense category.

## **Why Research Is Important**

Research, the pursuit of knowledge, is the life blood of a university. It is the key to economic development and new higher paying jobs in the state. New developing cutting-edge industries tend to locate near universities that are heavily involved in research related to their industry. Research is the basis for some of the most important parts of the upper level undergraduate and graduate level instruction. It provides students with cutting edge knowledge, problem-solving skills and familiarity with the latest technology which prepare them to be leaders in their chosen field. In addition, research results in a better quality of life for all citizens of Arkansas through the development of better medications, diagnostic equipment, methods of diagnosis and treatment of illness.

Commitment to research is a necessity in attracting the best faculty to a university. Faculty members who are involved in research are also a necessity for quality doctoral programs. Doctoral candidates are required to do research for dissertations and the guidance for both research ideas and methodology can only be provided by faculty who are actively involved in research.

The Nanotechnology research currently being conducted at several of Arkansas's doctoral institutions seems to have almost unlimited potential in numerous fields of human endeavor. This is particularly true in the developments in medicine.

Logistics research has allowed a number of Arkansas trucking firms to be leaders in the nation in their ability to deliver goods across America efficiently, economically and on time. The Arkansas Research and Education Optical Network (ARE-ON) is making the latest medical diagnosis and treatment capabilities available to rural hospitals and improving the health and longevity of those citizens who have not had access before without the expense of traveling a

great distance. Research is improving the quality of life for Arkansans in terms of health care, better jobs, and a quality education.

It is incumbent on Land Grant institutions (University of Arkansas & University of Arkansas at Pine Bluff) to have a commitment to research and to public service. Failure to be involved in both would result in the loss of significant federal funding. The research and public service functions of these Land Grant universities have resulted in our nation's farmers being the most productive in the world and our food supply exceeding our consumption.

Much of the research that has resulted in our major advancements have often started out as theoretical (basic) research, what some may have labeled "pie-in-the-sky," rather than applied research. This simply illustrates that the major thrust of research should not be only on applied research – research with immediate practical outcomes or seeking solutions to existing problems.

In summary, research improves the quality of life, attracts knowledge-based business and industry, improves economic development in the state, and creates better paying jobs in the state.

## **Tuition and Fees**

Certainly, tuition and fee increases at colleges and universities, both public and private, have been under scrutiny in Arkansas and the nation. Some of the major factors responsible for tuition inflation has been rising cost in technology, employee benefits, and campus security.

With the Governor and the Legislature's addition of roughly \$16,000,000 in State funding for higher education since the implementation of the Productivity Funding model in fiscal year 2018-19, institutions have been tasked with trying to limit tuition increases as to keep costs to students as affordable as possible. Even with these new state funds and cost saving measures, four-year institutions found it necessary to increase tuition and fees on average by .7 percent and two-year colleges needed to increase tuition and fees on average by .4 percent for fiscal year 2020-21 which is reflected in the charts below.

**Annual Full-time Undergraduate Tuition and Mandatory Fees  
for Four-Year Institutions (2015-16 through 2020-21)**

SOURCE: ADHE FORM 18-1

\*\*Mandatory Fees include both E&G and Auxiliary

As tuition and fees continue to rise, many students are finding relief with state and federal aid, including veteran’s benefits. For now, government subsidies and aid from schools are serving to hold down net tuition and fees – the actual cost students pay when grants and scholarships are taken into consideration.

## Operating Margins

Operating Margins are used to measure an institution’s operating efficiency. It is a measurement of what proportion of a college or university's revenue is left over after expenses. The operating margin shows what an institution makes per each dollar of revenue.

Two graphs comparing 2015-16 operating margins to the 2019-20 margins are presented below. The more detailed historical operating margins by institutions are in Appendix B. Of the 10 universities, there were 3 with negative operating margins both in 2019-20 as compared to 4 in 2015-16.

The graph below contains the comparison of 2015-16 and 2019-20 operating margins of the two-year colleges. Of the 22 institutions, four had negative operating margins compared to five in 2015-16.

*\*Note - Often negative operating margins are the result of expending prior year fund balances to complete a serious deferred maintenance problem.*

## Fund Balances

Educational and General Fund balances are the perennial measure of the financial condition of institutions for higher education. An institution’s fund balance is a measure of its resources. The fund balance reported is measured by subtracting the total unrestricted E&G liabilities of an institution from the total unrestricted E&G assets. For universities the minimum recommended level is 5 percent of the E&G operating budget with an ideal level of at least 14 percent. In 2019-20, all but two of the universities were able to achieve the minimum recommended level. However, it is important that other fund balances are studied in detail along with these findings.

Almost all of the two-year colleges had fund balances that exceeded the 5 percent recommended for E&G. Although all 22 of the two-year institutions fund balances were above the recommended 14 percent, this is not always adequate for the very small institutions. For those institutions with smaller budgets and enrollment, a better benchmark would be \$2.5 million in fund balance. Another important factor to consider when analyzing an institution’s fund balance is the effect of recognizing post-employment and retirement liabilities. The recognition of these future liabilities will decrease the current year’s fund balance. In addition, the Governmental Accounting Standards Board (GASB) has recently approved a new pension standard that will accelerate the recognition of pension/retirement liabilities. It will be important to continue to monitor the effects of the new GASB standards. The complete report of historical fund balances as a percent of revenue are in Appendix B.

## Institutional Scholarship Expenditures

The report for Institutional Scholarship Expenditures for 2019-20 indicates that the average university's expenditure for scholarships represented 9.2 percent of their total educational and general tuition and mandatory fee revenue. For 2019-20, the legislatively mandated cap on Academic and Performance Scholarships was 20 percent of educational and general tuition and fee revenue. All institutions reported scholarships below this mandated amount.

**Undergraduate Academic and Performance Scholarship Expenditures for Fiscal 2019-20\***

\*A.C.A. § 6-80-106 set a limit of 20% of tuition and fee income that could be used for scholarships. "Academic" and "Performance Scholarships" does not include scholarships made to a student who qualifies for a Pell Grant

A.C.A §6-80-106 establishes limitations on the maximum percent of unrestricted tuition and mandatory fee income that can be spent on academic and performance scholarships, which in 2011-12 was 30 percent. The scholarship cap decreased by 5 percent each fiscal year until it reached a 20 percent cap in 2013-14. Beginning in 2013-14, if an institution exceeds the cap there will be a reduction in the funding recommendation for the next fiscal year. Academic and Performance scholarships awarded to students who qualify for Pell Grants were excluded in the calculation of the scholarship cap in accordance with A.C.A §6-80-106. While these scholarships awarded to Pell qualifiers were excluded in the chart above, they make up 17.2 percent of the total amount of academic and performance scholarships awarded at universities.

The chart below provides a five-year history of the universities' scholarship expenditures for the purpose of observing trends in light of the legislation placing a cap on such expenditures. The 9.2 percent for 2019-2020 is the highest in the five-year span and a 0.3 percent increase from 2018-2019.

\*Academic and Performance scholarships awarded to students who qualify for a Pell Grant were excluded in accordance with A.C.A. § 6-80-106.

## **Educational and General Facilities**

The Facilities Audit Program reported the replacement values for E&G facilities as \$5.5 billion. The **E&G maintenance** needs as of 2020 shows that the institutions have **\$2.95 billion** in deferred maintenance with **\$259.8 million of that classified as critical**.

If Arkansas's colleges and universities are to prepare students for the economy of the future, they must have *cutting-edge* laboratories and classroom equipment. Yet, students enter college and find that their high school offered better equipped labs and facilities than the college or university they selected. This is a matter of concern for institutions that are expected to be leading the way with the latest technology for the disciplines they offer.

Faculty and staff work to find ways to compensate for the problems of inadequate labs and equipment, the quality of the graduates has not been compromised. The administration and faculty of the institutions deserve to be recognized for their efforts. If the desire is to produce more graduates in math, science and health professions, Arkansas must find funding for the equipment and facilities to support these disciplines. If not, Arkansas will find it difficult to compete in the economy of the 21st century.

## **Auxiliaries**

Auxiliaries are primarily a matter of university concern. Most two-year colleges have minimal auxiliary operations; therefore, the only analyses of auxiliaries in this report deal with the auxiliary operations of universities. The following two graphs deal with the auxiliary fund balances. The first depicts the changing auxiliary fund balances over a three-year period. The second represents the fund balances as a percent of auxiliary income. The auxiliary fund balances for 4 of the 10 institutions presented increased over the previous year.

Below is a series of spreadsheets that give the income and expenditures for institution by each type of auxiliary enterprise for 2019-20. The spreadsheets group the same category of institutions together for a better comparison of the profits and losses of each type of auxiliary enterprise.

From these spreadsheets it is obvious that bookstores are not “cash cows” as commonly believed. The difference you will notice in bookstores and food service are generally due to whether or not an institution has out-sourced/privatized its bookstore or food service operation. Modest income and very low expenditures usually indicate an institution that has out-sourced that operation. Losses in bookstore operations and food service are usually an indicator that the institution is operating its own bookstore and/or food service. As you can see in the graphs, another drain on Auxiliary funds is from the College Unions and/or Student Organizations and Publications.

### Auxiliary Enterprises at Four-Year I\* Institution FY 2020

## **Athletics**

Athletics are a major component of the auxiliary operations at universities. The athletic report details revenues and expenditures for each institution. Athletic revenues will equal athletic expenditures unless there is an ending fund balance. A.C.A. § 6-62-804 prohibits athletic deficits. A designated athletic fee must be charged to the students by the institution if athletic-generated revenues (i.e., ticket sales, media/tournament/bowl, concessions/program sales, and game guarantees), foundations/clubs and other private gifts, other athletic income, auxiliary profits, and the allowable educational and general transfer do not cover the total expenditures for athletics.

The 2019-20 total amount of athletic expenditures reported by state supported universities is \$191,460,243 and two-year colleges is \$1,749,814. The statewide total is \$193,210,057 – a decrease of \$9,783,531 (4.8%) from \$202,993,588 in 2018-19.

A comparison of 2019-20 actual expenditures to 2019-20 budgeted revenues certified to the Coordinating Board in July 2019 is also illustrated at the bottom of the summary chart. Certified budgeted expenditures for 2019-20 totaled \$200,070,766 for all institutions. Total actual expenditures for 2019-20 for all institutions was below this budgeted amount by 3.4% percent. Actual expenditures varied from the Board of Trustees certified budgeted expenditures by a range of 14 percent below to 98 percent over the budgeted amount.

Athletic expenditures since the 1990s have often grown faster than many institutions' overall budget. However, when athletics' expenditures and their interaction with educational and general income are examined together, a different perspective emerges. The importance of athletics to the educational and general budget becomes evident. Regrettably, such an analysis is beyond the scope and time constraints of this report.

Summary of Intercollegiate Athletic Revenues and Expenditures, 2019-2020

EXPENDITURES

The graph below looks at the revenue sources as a percent of total revenue which provides perspective on how dependent some institutions are on athletic fees, other auxiliary profits and E&G transfers to support their athletic program. The allowable athletic transfer from E&G revenue should be noted in this graph. The 2019-20 allowable transfer from E&G was the greater of either 2 percent of the institutions' FY19 Unrestricted E&G Revenues or \$1,362,789 for universities and \$151 per FTE for colleges regardless of the size of the institution or level of the athletic competition. For some institutions, the E&G transfer is less than 10 percent of the revenue but for others it represents up to 70 percent of the revenue.

**Athletic Revenue by Source 2019-2020**

The following graph presents athletic expenditures as a percent of the total university expenditures. The heavy yellow horizontal line represents the average for the universities. The average athletic expenditure (excluding UAF) for 2019-20 represented only 5.47 percent of the total of the universities' expenditures. When UAF is included, that brings the average up to the 6.29 percent reflected in the below graph.

## **RECOMMENDATIONS**

- Continue to work with institutions to monitor and refine the Productivity Funding Model policies to ensure adequate funding is available to meet student needs, innovation is encouraged, and that the policies continue to respond to attainment goals and priorities of the state.
- AHECB, ADHE and institutions of higher education work with the legislature toward alignment of institutional funding policies, state financial aid policies, and tuition policies in a way that prioritizes higher education affordability.

**Appendix F:**  
**Bonds and Loans Approved by**  
**AHECB 2007-2020**

Institution	Date of AHECB Approval	Maximum Total of Issue	Terms	Project Description	Type of Project
ASU	Oct-07	\$10,000,000	25 yrs / 5.25%	E&G purposes on the campuses at Searcy, Mountain Home, and Newport.	E&G
NAC	Oct-07	\$4,700,000	30 yrs / 4.85%	E&G purposes to construct refund outstanding bonds, renovate the L.E. "Gene" Durand Conference Center and for various other capital improvements.	E&G
SAUM	Oct-07	\$14,000,000	30 yrs / 4.5%	E&G purposes to construct a new science facility and for various other academic and administrative construction needs.	E&G
ATU	Feb-08	\$3,300,000	30 yrs / 5%	E&G purposes for the Physical Plant.	E&G
ATU	Feb-08	\$2,000,000	30 yrs / 4.6%	Auxiliary purposes for Campus Courts Housing.	Auxiliary
CCCUA	Feb-08	\$2,000,000	15 yrs / 3.2%	Loan for E&G purposes to construct the Ashdown Center, agriculture facility, Fine Arts classroom facility.	E&G
NPCC	Feb-08	\$3,800,000	30 yrs / 4.75%	E&G purposes to construct Nursing & Health Sciences Building.	E&G
ATU-Ozark	Apr-08	\$2,130,000	30 yrs / 5%	E&G purposes to construct student services facility and for various other capital improvements on the Ozark Campus.	E&G
ATU	Apr-08	\$8,000,000	30 yrs / 5%	E&G purposes to construct an academic/advising facility and for various other capital improvements.	E&G
UAF	Apr-08	\$6,150,000	20 yrs / 5.1%	E&G purposes to renovate space for KUAF and for the purchase of property.	E&G
UAF	Apr-08	\$44,850,000	30 yrs / 5.1-5.99%	Auxiliary purposes to construct a 1500-space parking garage with student-oriented retail space and a surface parking lot; to finance improvements to the Harmon Avenue Parking Garage; and to purchase properties for the facilities.	Auxiliary
SAU	May-08	\$6,345,000	30 yrs / 5.5%	E&G purposes to construct a new student activity/recreation center and for various other academic and administrative construction needs.	E&G
ATU	Jul-08	\$2,150,000	30 yrs / 5%	Auxiliary purposes to fund the renovation of Critz and Hughes Hall.	Auxiliary
UACCH	Jul-08	\$2,700,000	30 yrs / 5%	E&G purposes to complete financing for the Science/Technology Center.	E&G
PCCUA	Jul-08	\$12,305,000	30 yrs / 5%	E&G purposes to refund the 1997 bond issue and complete financing for the Grand Prairie Center on the Stuttgart campus.	E&G
UAF	Jul-08	\$5,000,000	5 yrs / 5%	Auxiliary loan used for renovations to various athletic facilities.	Auxiliary
UCA	Oct-08	\$6,000,000	1 yr / 4.59%	E&G loan/line-of-credit for operational purposes.	E&G
ASU-SYS	Jan-09	\$9,500,000	30 yrs / 5.5%	Auxiliary purposes to construct and furnish two new 50-bed residence halls, construct a commons building for an existing campus apartment complex, and deferred maintenance projects in existing residence halls.	Auxiliary
UAFS	Jan-09	\$24,540,000	25 yrs / 6.05%	Auxiliary purposes to construct and equip a 400-bed student housing complex.	Auxiliary
UAM	Jan-09	\$1,000,000	10 yrs / .53%	E&G purposes to fund deferred maintenance and energy savings projects on the Monticello campus.	E&G
ATU	Apr-09	\$5,120,000	30 yrs / 5.25%	E&G purposes to expand the engineering building, purchase academic facilities, expand the science building, and various other capital improvements.	E&G
SAU	Apr-09	\$2,000,000	30 yrs / 5.5%	E&G purposes to renovate and update current academic and administrative facilities.	E&G
UCA	May-09	\$6,000,000	1 yr / 4.96%	E&G loan/line-of-credit for operational purposes.	E&G
SACC	Jul-09	\$3,590,000	30 yrs / 5%	E&G purposes to construct a Health Sciences building.	E&G
ASUMH	Jul-09	\$2,500,000	20 yrs / 5.5%	E&G purposes to construct a Community Development Center.	E&G
NWACC	Jul-09	\$10,660,000	30 yrs / 5%	E&G purposes to purchase property adjacent to the main campus as an extension of education and general instructional space and offices.	E&G
UALR	Sep-09	\$34,750,000	20 yrs / 5.5%	E&G purposes to acquire, construct, and equip a variety of capital improvements at UALR, including (i) completion of the Engineering and Information Technology Building, (ii) elevator upgrades; (iii) renovations to the Stella Boyle Smith Concert Hall, (iv) construction of a Nanotechnology Sciences Center, (v) construction of a Student Services One-Stop Center, (vi) renovation of an existing building for Health and Wellness Academic Programs.	E&G
UALR	Oct-09	\$30,000,000	25 yrs / 4.5%	Auxiliary purposes to construct and equip a housing complex and construct a student recreation and sports complex.	Auxiliary
SAU	Oct-09	\$10,310,000	30 yrs / 4.85%	Auxiliary purposes to refund the 1999, 2001 and 2003 auxiliary issues, auxiliary construction purposes and other various capital improvements.	Auxiliary
OZC	Oct-09	\$3,600,000	30 yrs / 4.8%	E&G purposes to refund a previous bond issue and construct an educational facility at the Mtn. View location.	E&G

Institution	Date of AHECB Approval	Maximum Total of Issue	Terms	Project Description	Type of Project
UAF	Dec-09	\$54,000,000	30 yrs/ 5.5%	Auxiliary and E&G purposes to fund E&G renovation projects in Peabody Hall for the College of Education and Health Professions, Phase I of classrooms and teaching laboratories, Old Health Center for Nursing and the Speech and Communication Disorders Clinic, Bud Walton Hall for the David and Barbara Pryor Center for Arkansas Oral and Visual History and the Center for Space and Planetary Sciences, Davis Hall for University Relations (\$4 million), and Utility Tunnel Expansion; to construct the Nanoscale Science and Engineering Building; and to purchase property and various equipment. The proceeds will also be used to fund auxiliary renovation projects in various residence halls and one fraternity.	Auxiliary
UACCB	Jan-10	\$1,000,000	10 yrs/ 0.45%	CSRB Loan used in conjunction with higher education bond funds to construct a Nursing and	E&G
ASUB	Jan-10	\$11,950,000	30 yrs/ 4.75%	Auxiliary purposes to construct and furnish a 248-bed student housing complex.	Auxiliary
ATU	Apr-10	\$1,730,000	30 yrs/ 5.25%	E&G and auxiliary purposes. E&G purposes to fund 33 percent of the cost to renovate an existing student services center for the purpose of creating a student union that will include library and computer lab facilities for academic use and auxiliary purposes to fund 67 percent of the cost to renovate an existing student services center for the purpose of creating a student union that will expand the bookstore and add food service operations.	E&G/Auxiliary
