ACADEMIC PROGRAM REVIEW
AY2026

Arkansas Code §6-61-214 requires that the Arkansas Higher Education Coordinating Board (AHECB) review existing academic programs at Arkansas public colleges and universities to identify certificate and degree programs not meeting minimum standards of quality and to establish schedules for either resolving these concerns or removing the programs from the AHECB approved program inventory.

The existing academic program review policies were adopted in 1988 and revised in 1995, 1998, 2008 and last updated in January 2025. Institutions have been submitting program reviews for more than 35 years.

Arkansas colleges and universities are required to employ external consultants to review all certificate and degree programs over a period of 7-10 years with the findings from the reviews reported to the Coordinating Board. Accredited, licensed and state certified programs follow the usual review practices and the schedule of the accrediting/approval body.

A quality program review, or self-study, describes the status of a program, assesses program strengths, identifies areas for improvement, and provides strategic direction on program goals and specific plans to achieve those goals. The external reviewers' written report must include a summary of each area examined and should provide examples that document the conclusions. This summary report does not include a recommendation to AHECB on program continuation or program deletion.

The following tables summarize the reports submitted to ADHE during Academic Year 2025-2026.

4-year Institutions

Institution	Degree Code	Award	Program Name	Program Approval Date	Date of Last Program Review
ASU	1350	BA	Computer Science	2/1/2001	2026
